

# **Exposure Exercises**

## **Pictures in open shade using various metering techniques and exposure modes.**

Shoot in mid-day, the usual wrong time to shoot. Do not use flash. Do not use fully automatic (GREEN) mode. Arrange your subject under a tree so that the subject is in the shade but the background is brightly lit.

**Start either in early morning or late evening, but not in the dark. Do not use flash. Do not use fully automatic mode.**

**1. Programmed Automatic and ISO set manually**

**2. Manual Mode**

**A. Take a general meter reading of the whole scene, and expose according to the meter.**

**B. Take a close-up meter reading of your subject, set your exposure. Return to where you want to take your picture, and shoot.**

**C. Take a meter reading of the background, Set your exposure, shoot.**

**4. If you have questions, call or email me.**
